THE SMARTWATCH INSPYRE™ SOLUTION

When the SmartWatch Inspyre™ by Smart Monitor detects repetitive shaking motion, it signals the user's device (iPhone or Android phone) to send text and phone call alerts to whomever the SmartWatch Inspyre™ user designates, such as multiple family members and care providers.

Within seconds, family members receive these alerts which include the date, time, location, and duration of the event. SmartWatch Inspyre™ users can also summon help with the push of a button. Alerts can be sent to any phone, anywhere, and detailed reports of each event can be securely accessed for later review with physicians.

Abnormal Motion Data Collected

“ My name is Emily and I developed epilepsy when I was 9 years old. Most of my seizures are at night time. I love my Smart Monitor watch. I go straight to sleep now knowing that my watch and my dog, Macy, are taking care of me. It's made my life so much better and my mom's too. Thank you Smart Monitor.

—EMILY M.

INDEPENDENCE

"I am beyond grateful for the Smart Monitor and the peace of mind it will afford me. My son (is) an active, independent 15 year old and this watch will allow him to regain a little of the independence he enjoyed before the seizures began. Thank you from the bottom of my heart!"

—JENNIFER A.

SAFETY

"The Smart Monitor has been amazing. It alerted us to a myoclonic just in time. We were able to get my daughter to the hospital quickly, as she goes into respiratory distress often. We also were able to show the doctors the data of what was recorded, and she is going back into the hospital to try to get better control on her meds. The Smart Monitor is a life saver!"

—TRACY W.

PEACE OF MIND

The Smart Monitor has definitely increased my peace of mind. My daughter lives on her own, and I would constantly worry about her safety. While wearing the Smart Monitor she experienced a seizure on a different floor than her roommate, but her roommate was instantly alerted and was there to help immediately. Knowing she can receive help right away makes her more confident and allows me to worry less."

—ROBERT B.
